Studio Floor Plan

Using the CPA-TV Studio Floor Plan below (not to scale), please illustrate your set proposal. This encompasses your entire design for the set and the placement of each item, including furniture, backdrops and plants. Remember to include the placement of all three studio cameras (if using three cameras) as well as studio lighting. All programs should have at least two lights in the front and two in the back, placed diagonally toward the set, to provide ample lighting for our broadcast cameras. Producers must also remember to return the studio to its original form upon completion of your program. If you have any questions regarding set design, please call us at (434) 995-5905.
